OUAVM concludes academic exchange agreements with two institutes in Poland

OUAVM has concluded academic exchange agreements with the Institute of Animal Reproduction and Food Research of the Polish Academy of Sciences (PAS) and the University of Warmia and Mazury in Olsztyn (UW) in Poland.

PAS is one of EU's leading research institutes and is comprised of the Reproduction and Pathology Department and the Food Science Department. UW is one of Poland's top universities and is comprised of 17 departments with excellent educational and research systems, including Veterinary Science, Food Science and Agricultural Departments.

These agreements will allow OUAVM to exchange information and have research meetings with PAS by inviting researchers to implement international collaboration in the reproduction, pathology and food functionality fields, and to promote student exchange and academic exchange with UW in the veterinary medicine field in addition to sharing information with the university to obtain accreditation for veterinary education in Europe.

Mr. Dariusz Jan Skarzynski, the director of the Reproduction and Pathology Department of PAS, President Okuda, and Mr. Jerzy Jaroszewsk, the vice-president and director of UW (from the left, at OUAVM)
