

9 Veterinary Medical Center

This center carries out education and research by providing veterinary care for cattle, horses and other livestock as well as dogs and cats.

10 General Research Building IV

This building houses labs of the Research Center for Diagnostic Center for Animal Health and Food Safety and the National Research Center for Protozoan Diseases. Entry to certain labs is restricted.

11 Diagnostic Center for Animal Health and Food Safety

Diagnoses for animal health and food safety are carried out in this center.

12 Large Animal Hospital and Clinical Research Building

Education and research for farming industry are conducted through the medical care of cattle and horses. This building has a CT scanner, an MRI machine and other advanced clinical equipment.

13 National Research Center for Protozoan Diseases

This is the only Japanese university of veterinary medicine and agriculture that is designated as a national joint-use facility. Research on developing diagnostic methods, treatments and preventive measures to control livestock protozoan diseases are conducted.

14 Center for Regional Collaboration in Research and Education

The Center serves as a channel for joint research with private institutions, collaborative industry-academia-government projects such as those for technical guidance, and human resource development programs.

15 Horse Barn and Stables

The Barn is a base for activities of the longstanding Equestrian Club. Horses can be observed training in the mornings and evenings. It is the most historically significant structure on campus.

16 Field Center of Animal Science and Agriculture

This center has a large area of cultivated land with about 180 cows. The cows are used for practice and research. Chikudai Milk and other dairy products are made from milk collected by students.

When using that parking, please display a card indicating the place of your visit and your name, or leave your business card in the front driver's seat, so that it can easily be recognized from the outside.

A Campus of Mutual Learning and Exchanges

Obihiro University of Agriculture and Veterinary Medicine is located near the center of vast Tokachi Plain. The large campus, approximately 1,900,000m², is inhabited by great spotted woodpeckers, Japanese dwarf flying squirrels, and Ezo squirrels. The verdant campus is ideal for experiencing Hokkaido's natural splendor. Obihiro University of Agriculture and Veterinary Medicine is the only Japanese national university that is dedicated solely to veterinary medicine and agriculture.

2 University Library

It holds approximately 200,000 books published in Japanese and other languages. You are welcome to use this library, which is open to the public. It is also open on Saturdays, Sundays and holidays.

3 Dormitory

Many students are living at the dormitory from all of Japan. (All rooms are individual rooms. The numbers of capacity 302peoples.)

4 Shōyōsha (Alumni building)

To commemorate the university's 70th anniversary, the structure was built with donations from the university alumni association. It is used as a venue for exchanges among alumni, staff and students.

5 University Co-op

The facility provides a store on the 1st floor and a school cafeteria on the 2nd floor. The store sells the Chikudai brand of milk, ice cream, bread and other goods.

6 Kashiwa Plaza (Student Lounge)

Renovation was completed in April 2010. It is for club activities, events and conferences.

7 Administration Bureau

The right side of the building is the administration bureau of Obihiro University of Agriculture and Veterinary Medicine; and, the left side is the office of Hokkaido Higher Education and Research System.

8 General Research Buildings II and III, and Hakuryo Pond

North of Research Buildings II and III, the Hakuryo Pond biotope is home to wild ducks and dragonflies.
